Mathis Hage

+33 6 10 64 72 92 | mathis.hage@epfl.ch | Lausanne, Switzerland

EDUCATION

EPFL (École Polytechnique Fédérale de Lausanne) 2026 – Present
MSc Computer Science (Minor in Mathematics)

EPFL 2022 – 2025
BSc Computer Science 5.44 / 6 GPA

RELEVANT EXPERIENCE

Research Intern Summer 2026
ALGO group University of Geneva

- Investigated proof complexity and computational complexity questions about the ZX-calculus language for quantum computing.
- Report and oral presentation available on Github : https://github.com/MathisHage/zx_calculus_internship

Student Assistant Spring 2024, 2026 and Fall 2026
Undergraduate level courses EPFL

- Assisted students during exercise sessions in Advanced Information, Computation and Communication II (Spring 2024), Theory of Computation (Spring 2026) and Stochastic Models in Communications (Fall 2026).
- Provided guidance on problem-solving in theoretical computer / communication science topics and related.

PROJECTS

Networks Out Of Control (COM-512) Fall 2026
Research Paper Analysis EPFL

- Summarized and analyzed a theoretical paper on graph theory
- Presented abstract results in a short oral presentation
- Work available on Github : https://github.com/MathisHage/nooc_project

Optimization for ML (CS-439) Fall 2026
Empirical Study EPFL

- Studied empirically the effects of quantizing the Q-table of a Q-learning problem at training time.
- Gave insights on the usefulness of such an approach.
- Work available on Github : https://github.com/MathisHage/opti_ml_project

Principles of Digital Communication (COM-302) Fall 2025
Implementation and Analysis of an Encoder / Decoder EPFL

- Implemented and studied the theoretical performances of a simple encoder / decoder.
- Work available on Github : https://github.com/MathisHage/PDC

Software Enterprise (CS-311) 2024 – 2025
Android App Development EPFL

- Worked in a team to design and develop an application
- Learned and applied software engineering practices (project management, collaboration, development workflows)
- Focused on optimizing development processes to deliver a high-quality product.

SKILLS

Languages: French (native), English (C1).

Tools: Proficient in LateX, Git. Responsible and calculated usage of AI agents as part of my workflow.

Programming: Proficient in declarative, imperative, functional and object-oriented programming. Languages include Python, Scala, C, C++, Java, Kotlin.
